

Osmania University Syllabus for  
M. Pharmacy  
(Pharmacology)  
(w.e.f. academic year 2009-10)

FACULTY OF TECHNOLOGY  
HYDERABAD

**Scheme of Instruction and Evaluation for M. Pharmacy  
(Pharmacology)**

**I – Semester – Revised-2009**

Subject Code	Subject / Paper	Theory / Practical	Instruction Hours per week		Evaluation		Duration of External Examination
			Theory	Practical	Internal	External	
M.PCOL.T.1.101	Pharmaceutical Analytical Techniques	Theory	4	---	30	70	3
M.PCOL.T.1.102	Drug Design and Molecular Pharmacology	Theory	4	---	30	70	3
M.PCOL.T.1.103	Bioassays and Screening Methods	Theory	4	---	30	70	3
M.PCOL.T.1.104	Principles of Toxicology	Theory	4	---	30	70	3
M.PCOL.P.1.105	Pharmaceutical Analytical Techniques	Practical	-	6	30	70	6
M.PCOL.P.1.106	Bioassays and Screening Methods	Practical	--	6	30	70	6
M.PCOL.T.1.107	Scientific and Technical Writing (SAIL)	Tutorial	2	-	A/B/C/D	-	-
M.PCOL.1.108	Seminar	Theory		8	50		
			18	20	230	420	

**Scheme of Instruction and Evaluation for M. Pharmacy  
(Pharmacology)**

**II– Semester – Revised-2009**

Subject Code	Subject / Paper	Theory / Practical	Instruction Hours per week		Evaluation		Duration of External Examination
			Theory	Practical	Internal	External	
M.PCOL.T.1.201	Intellectual property rights & Regulatory affairs	Theory	4	---	30	70	3

SAIL: Self assess Instrumentation Learning

**Scheme of Instruction and Evaluation for M. Pharmacy  
(Pharmacology)**

**Semester III and IV**

**DISSERTATION** – Original research work carried out by the candidate under the guidance of regular teaching faculty/visiting faculty of the department should be submitted in a bound form.

Evaluation of the dissertation shall be done by external and internal examiners appointed by the university.

Dissertation viva-voce

Grade A/B/C/D/F

Dissertation report

Grade A/B/C/D/F

A. Excellent    B. Very good

C. Good

D. Fair

F. Fail

## PHARMACEUTICAL ANALYTICAL TECHNIQUES

**Subject Code: M.PCOL.T.1.101**

Period / Week: 4

Nature of Exam: Theory

Sessional : 30

Examinations : 70

Duration of Exam : 3 hrs

---

### UNIT – I

**a) UV-Visible Spectroscopy:** Basic principles, interaction of electromagnetic radiation with matter and its effects (electronic transitions). Concept of chromophore and auxochrome, effect of conjugation, solvent and pH. Instrumentation (components and their significance). Absorption spectra of organic compounds and complexes illustrating the phenomenon and its utilization in qualitative and quantitative studies of drugs including multicomponent analysis. Woodward-Fieser rules for calculating absorption maximum for unsaturated hydrocarbons. Difference and derivative spectra.

**b) Infra-Red Spectroscopy:** Interaction of infrared radiation with organic molecules and its effects on bonds. Instrumentation- Dispersive IR spectrophotometers and Fourier transform spectrophotometers. Sample handling for IR spectroscopy. Interpretation of IR spectra. Brief note on ATR. (Attenuated Total Reflectance).

### UNIT – II

**Nuclear Magnetic Resonance Spectroscopy:** Fundamental principles of NMR, instrumentation (components and their significance). Chemical shifts concept, spin-spin coupling, spin-spin decoupling, shielding and deshielding, solvents. signal multiplicity phenomena in high resolution PMR. Interpretation of PMR spectra.

Brief introduction about Carbon-13 NMR and 2D NMR Spectroscopy.

### UNIT – III

**Mass Spectrometry:** Basic principles and instrumentation (components and their significance). Ionization techniques, mass spectrum and its characteristics, molecular ion, metastable ions, fragment ions; fragmentation processes, fragmentation patterns and fragment characteristics in relation to parent structure and functional groups. Relative abundances of isotopes and their contribution to characteristic peaks.

### UNIT – IV

**Chromatographic Techniques:** Classification of chromatographic methods based on mechanism of separation and their basic principles. **Gas chromatography:** Instrumentation, column efficiency parameters, derivatisation methods, applications in pharmaceutical analysis. **Liquid chromatography:** Comparison of GC and HPLC, instrumentation in HPLC, normal and reversed phase packing materials, column selection, mobile phase selection, efficiency parameters, applications in pharmaceutical analysis. Instrumentation and applications of HPTLC, ion exchange chromatography, gel permeation chromatography, chiral chromatography, flash chromatography, and supercritical fluid chromatography (SFC).

### UNIT – V

**Electrophoresis:** Principles, instrumentation and applications of moving boundary electrophoresis, zone electrophoresis (ZE), isotachphoresis, isoelectric focusing (IEF), continuous electrophoresis (preparative) and capillary electrophoresis. SDS gel electrophoresis and blotting techniques.

**Radio immunoassay and ELISA:** Principle, instrumentation, applications and limitations.

## Recommended books

1. Skoog, DA, Holler, FJ, Crouch, SR. Principles of instrumental analysis. 6<sup>th</sup> ed., Baba Barkha Nath printers, Haryana, 2007.
2. Silverstein, RM, Webster, FX. Spectrometric identification of organic compounds. 6<sup>th</sup> ed., John Wiley & Sons (Asia) Pvt. Ltd., Singapore, 2005.
3. William Kemp. Organic spectroscopy, 3<sup>rd</sup> ed., Palgrave, New York, 2006.
4. Jag Mohan, Organic spectroscopy: Principles and Applications, 2<sup>nd</sup> ed., Narosa publishing house Pvt Ltd., New Delhi, 2005.
5. Connors KA. A Text book of pharmaceutical analysis, 3<sup>rd</sup> ed., John Wiley & Sons, Singapore, 2004.
6. Willard HH, Merritt LL, Dean JA, Settle FA. Instrumental methods of analysis, 7<sup>th</sup> ed., CBS Publishers & Distributors, New Delhi, 1986.

## DRUG DESIGN AND MOLECULAR PHARMACOLOGY

Subject Code : M.PCOL T.1.102

Periods/Week : 4

Nature of Exam : Theory

Sessional :30

Examination : 70

Exam Duration : 3 Hrs

---

### UNIT –I

Pharmacokinetics approach to New Drug Discovery

Basic concepts and Definition, importance of ADME parameters in disposition, therapeutics and development their implication on drug discovery.

### UNIT-II

Overview on computer aided Drug design (CADD) including QSAR, Combinational Chemistry, High Throughput screening (RTS)

### UNIT-III

Molecular Basis of Drugs Action: Cell signaling, communication between cells and their environment, ion-channels, organizations of signal transduction pathways, third messengers, biosensors.

Drug Latentiation :Basic concept, Prodrugs of functional groups, Bio-precursor prodrugs, chemical delivery system.

### UNIT – IV

Biotechnology in Drug Discovery: Cloning of DNA, Expression of cloned DNA, Manipulation of DNA sequence information, New Biological Targets for Drug Development Novel Drug Screening strategies, Novel Biological Agents, Antibodies, Antisense oligonucleotide therapy, Gene therapy.

### UNIT – V

Herbal Neutraceuticals as new source for medicines.

Study of Advanced drugs from natural sources of following groups:

Anticancer, Anti AIDS, Hepatoprotectives, Antidiabetics, Brain Tonics, Anti urolithiatics, Antifilarial, Antihyperlipidemics.

Modern phytochemical screening techniques and evaluation of herbal drugs and their extracts and formulations, Concept of Reverse Pharmacognosy.

### Books recommended

1. Comprehensive Medicinal chemistry Vol-4 Ed.C. Hansch, Pergamon Press, New York.
2. Comprehensive Biotechnology, Ed. Murray Moo-Young, Pergamon Press, New York.
3. Comprehensive Biotechnology information publications ([www/nobi.nlm.nih.gov](http://www/nobi.nlm.nih.gov))
4. Dewick Paul M. Medicinal Natural Products-A Biosynthetic Approach.
5. Chakravarty T.K. “ Herbal Options”.

## BIOASSAYS AND SCREENING METHODS

Subject Code : **M.P COL T.1.103**

Periods/Week : 4

Nature of Exam : Theory

Sessional : 30

Examination : 70

Exam Duration: 3 Hrs

---

### UNIT – I

Drug discovery process: Principles techniques and strategies used in new drug discovery. High throughput screening. Human genomics robotics and economics of drug discovery, Regulations, for laboratory animal care and ethical requirements.

Bioassays : Basic principles of bioassays official bioassays, experimental models and statistical designs employed in biological standardization. Biological standardization of vaccines and sera with certain examples with reference to IP. Development of new bio assay methods.

### UNIT – II

Preclinical models employed in the screening of new drugs belonging to following categories.

Antifertility agents, sympathomimetics, parasympathomimetics, muscle relaxants (both central and peripheral). Sedatives, hypnotics, antiarrhythmic agents, cardiac stimulants, cardiotonic agents bronhodilators, antihistaminics, eicosanoids.

Antipsychotic agents, antianxiety agents nootropic drugs antidepressant drugs; antiparkinsonism agents, antiepileptics; analgesics and anti-inflammatory agents; antiulcer agents; infarction; antiatherosclerotic drugs; antidiabetics; models for status epilepticus drugs. cerebroventricular and other newer techniques of drug administration and development; transgenic animals and other genetically prone animal models.

### UNIT – III

Alternatives to animal screening procedures, cell-line handling and maintenance and propagation of cell lines, patch-clamp technique, in-vitro cell line based assays diabetes and arthritis models, molecular biology techniques.

### UNIT – IV

Principles of toxicity evaluations, ED<sub>50</sub>, LD<sub>50</sub> and TD values, International guidelines (ICH Ethics and animal experimentation recommendations). Guidelines and regulatory agencies – CPCSEA, OECD, FDA, FHSA, EPA, EEC, WHO etc,

### UNIT – V

Introduction to biostatistics, parametric and non-parametric tests. Regression and correlation: Linear regressions, Method of least squares; correlation coefficients, rank correlation, multiple regression Tests of significance: testing hypotheses, tests of significance based on normal distribution. t-test; significance of correlation coefficient. F-test and Analysis of Variance: 1-Way, 2-Way and 3-way classification, Chi-square test of (i) Variance of a normal population (ii) Goodness of fit, (iii) Independence in contingency tables. Non parametric tests, order statistics, sign test, run test, Median test.

## **Books recommended**

1. Pre – Clinical Drug Development , Rogge
2. Basic and clinical Pharmacology, Katzung
3. Pharmacological screening methods, N.S. Parmer and Shivkumar
4. Pharmacological screening methods, N.S. Parmer and Shivkumar
5. Calculations for Pharmaceutical Practice , Winfield
- 6.** Pharmacoepidemiology , Storm
7. CPCSEA, OECD, FDA, WHO, ICH guidelines from respective website downloads.
8. Drug discovery and pharmacological evaluations, G.Vogel, Springer publications.

## **BASIC PRINCIPLES OF TOXICOLOGY**

Subject Code : **M.PCOL T.1.104**  
Periods/Week : 4  
Nature of Exam : Theory

Sessional : 30  
Examination : 70  
Exam Duration : 3 Hrs

---

### **Unit – I**

General principal of regulatory toxicology. Use of animals in preclinical toxicology studies, role of preclinical toxicology in drug discovery and development process. Experimental considerations for assessing possible human risk. Flow chart for development of preclinical testing. Dose conversion factors, clinical signs toxicity.

### **Unit – II**

Single dose and repeat dose toxicity studies; Factors influencing such studies such as species, sex, size, route ,dose level; Data evaluation and regulatory requirements. Determination of Maximum Tolerated Dose (MTD) and LD 50 as per revised OECD guidelines. Allergenicity testing, dermal toxicity, immunotoxicology and in vitro methods of toxicology.

### **Unit – III**

Reproductive toxicology assessment of male reproductive toxicity, spermatogenesis; Risk assessment in male reproductive toxicity; Female reproductive toxicology; Oocyte toxicity; alterations in reproductive endocrinology; Relationship between maternal and developmental toxicity.

### **Unit – IV**

Mutagenicity; Mechanisms of mutagenesis, point mutations,; Individual chromosomes and complete genome mutations, germ cell mutations, somatic cell mutation; Tests systems in vitro, chromosome damage and chromosomal aberration test, gene mutation, in vivo micronucleus tests in rodents, metaphase analysis.

### **Unit – V**

Preclinical toxicological requirements for biologicals and biotechnological products; safety analysis; problems specific to recombinant products, toxicokinetics, principles of GLP as per OECD guidelines for conducting preclinical toxicity studies

### **Books recommened**

1. Drug safety Evaluation, Shayne C Gad, Wiley Interscience
2. The toxicologist's pocket handbook, Michael J derelanko 2<sup>nd</sup> Ed,2008,CRC press
3. Relevent OECD guidelines ( Internet resources)  
<http://www.ingentaconnect.com/content/oecd/16073/2001/00000001/00000004>

## PHARMACEUTICAL ANALYTICAL TECHNIQUES (PRACTICAL)

**Subject Code : M.PCOL.P.1.105**

Period / Week: 6

Nature of Exam: Practical

Sessional : 30

Examination : 70

Exam Duration : 6 Hrs

---

### List of Experiments

1. UV/Visible spectrum scanning of a few organic compounds for UV- absorption and correlations of structures (5 compounds) and isosbestic point in case of mixtures.
2. Effect of solvents and pH on UV spectrum of drugs (2 experiments).
3. Estimation of multicomponent formulation by UV- Spectrophotometer in formulations. (2 experiments).
4. Experiments based on the application of derivative spectroscopy. (2 experiments).
5. Experiments based on HPLC (Isocratic and Gradient elution) techniques. (2 experiments).
6. Interpretation of drugs by IR spectra.
7. Workshop of spectroscopy: (UV, IR, NMR, MASS) structural elucidation of at least 5 compounds (4 experiments).
8. Separation of protein drug substances by electrophoresis.
9. Any other relevant experiments based on theory.

## BIOASSAYS AND SCREENING METHODS

**Subject Code : M.PCOL P 1.106**

Periods/week : 6

Nature of Exam: Practicals

Sessional : 30

Examination : 70

Exam Duration: 6 Hrs

---

### List of Experiments

1. Biological standardization of drugs like acetylcholine/Histamine
2. Experiments on CNS. General screening methods of drugs on CNS  
CNS stimulants and depressants, anxiogenics and anxiolytics, amnestics  
and nootropics, anti convulsants, analgesics, safety pharmacology.
3. Drugs acting on Gastrointestinal tract  
General screening methods for the anti ulcer activity, intestinal motility, and anti-diarrhoeals.
4. Experiments on CVS  
General screening procedure of anti-arrhythmic agents, anti-hypertensives, anti-ischemics.
5. Experiments on Local anesthetics  
General methods for evaluating local anesthetic activity
6. Experiments on General Pharmacology  
Enzyme induction activity, drug dependence and withdrawal effects.
7. Experiments on Diuretics  
General screening methods for evaluating the diuretic activity.
8. Screening procedure for antidiabetic drugs.
9. Experiments on analgesic and anti-inflammatory agents  
General methods of screening for the evaluation of analgesics and  
anti inflammatory agents, [both acute and chronic models]
10. General methods for evaluating the antimicrobial activities of chemotherapeutic agents.
11. Estimation of biochemical and free radical scavengers.

### Recommended books

1. Hand book of Experimental Pharmacology S.K.Kulkarni
2. Hand book of laboratory animal science, Animal models, Jann Hau, 2<sup>nd</sup> edition vol 2, 2002.
3. Hand book of Laboratory Animal Science: Selection and Handling of Animals in Biomedical research: v 1, Per Svendsen, Jann Hau, 1994

# SCIENTIFIC AND TECHNICAL WRITING

**Subject Code : M.PCOL T 1.107**

Periods/week : 2

Nature of Exam : Tutorials

Sessional : 50

Examination : --

Exam Duration: --

---

## **Course Objectives**

To be able to appreciate and understand importance of writing scientifically.

- To Develop competence in writing and abstracting skills.
- To write either a draft research proposal or a chapter of dissertation.

## **UNIT – I**

### **COLLECTION AND EVALUATION OF INFORMATION**

Identification sources, searching information, classifying information under fact/opinion, tabulating information, summarizing a text and presenting sequence of topics in different forms.

## **UNIT – II**

### **WRITING AS A MEANS OF COMMUNICATION**

- Different forms of scientific and technical writing.
- Articles in journals, Research notes and reports, Review articles, Monographs, Dissertations, Bibliographies.

How to formulate outlines: The reasons for preparing outlines

- (i) as a guide for plan of writing
- (ii) as skeleton for the manuscript

Kinds of outline: topic outlines, conceptual outline, sentence outlines and combination of topic and sentence outlines

## **UNIT – III**

### **DRAFTING TITLES, SUB TITLES, TABLES, ILLUSTRATIONS**

- Tables as systematic means of presenting data in rows and columns and lucid way of indicating relationships and results.
- Formatting Tables: Title, Body stab, Stab Column, Column Head, Spanner Head, Box Head
- Appendices: use and guidelines

The Writing process: Getting started, Use outline as a starting device, Drafting, Reflecting and Re-reading

Checking: Organization, Headings, Content, Clarity and Grammar

Brevity and Precision in writing - Drafting and Re-drafting based on critical evaluation

## **UNIT – IV**

### **PARTS OF DISSERTATION/RESEARCH REPORT/ARTICLE**

Introduction, Review of Literature, Methodology, Results and Discussion

Ask questions related to: content, continuity, clarify, validity internal consistency and objectivity during writing each of the above parts.

## **UNIT – V**

### **WRITING FOR GRANTS**

Clearly state the question to be addressed; Rationale and importance of the question being address; Empirical and theoretical conceptualization; Presenting pilot study/data; Research proposal of method; Clarity, specificity of method; Clear organization; Outcome of study and its implications; Budgeting; Available infra-structure and recourses and Executive summary

## INTELLECTUAL PROPERTY RIGHTS & REGULATORY AFFAIRS

**Subject Code : M.PCOL T 1.201**

Periods/week : 6

Nature of Exam: Theory

Sessional : 30

Examination : 70

Exam Duration: 3 Hrs

---

### UNIT – I

Concepts of total quality management, good laboratory practices and ISO.

Quality assurance & Quality control for active pharmaceutical ingredients (APIs) and other intermediates in process and finished products. GMP for bulk drugs and formulations.

### UNIT – II

Validation of process, equipment, procedures, validation master plans.

Documentation: Master Records – Manufacture, analysis of raw materials & finished products.

Batch Records - Manufacture & Analysis of raw materials & finished products.

Regulatory compliance records, Distribution records, Drug recall registers, management review records etc.

### UNIT – III

Regulatory acts: An understanding of the Drugs & cosmetics Act 1940 & rules 1945, - with special relevance to schedule M, Schedule U, Schedule Y, latest drug price control order, latest pharmaceutical policy / drug policy.

### UNIT – IV

US Regulatory practices: USFDA approvals, WHO – GMP, certification procedures, ICH guidelines.

### UNIT – V

Indian Patent Act as amended up to date with reference to drugs and Intellectual property rights, world trade Organization, filing a patent under Indian patent Act, Filing International patent, Infringement of patent; Doha Declaration, Trade Related Intellectual Property rights. (TRIPS).Patent search, patent challenging and para IV filing

### Recommended Books

1. Drugs & Cosmetics Act 1940 by Vijay Malik.
2. Drugs Laws by Hussain.
3. Indian patent Act.
4. Quality assurance & GLP by Y. Anjaneyulu.
5. Quality control & Application by Bentrard L. Hanser.
6. Quality assurance in Analytical chemistry by Werner Funk.

## ADVANCES IN PHARMACOLOGY

**Subject Code : M.PCOL T 1.202**

Periods/week : 6

Nature of Exam: Theory

Sessional : 30

Examination : 70

Exam Duration: 3 Hrs

---

### UNIT – I

#### Receptor Pharmacology

General aspects of receptor pharmacology, structural and functional aspects of receptors, regulation of receptors, isolation, classification and characterization of receptors.

### UNIT – II

#### Neurotransmission Pharmacology

General aspects and steps involved in neurotransmission

Neurohumoral transmission in autonomic nervous system.

Neurohumoral transmission in central nervous system

Non-adrenergic non-cholinergic transmission [NANC].

### UNIT – III

A detailed study of the mechanism of action, pharmacology of drugs used in ANS-Parasympathomimetics and lytics, sympathomimetics and lytics, agents acting at neuromuscular junction and ganglia.

CNS- General anaesthetics, sedatives, hypnotics. Drugs used to treat anxiety, depression, psychosis, mania, epilepsy, neurodegenerative diseases, drug dependence and addiction.

CVS- diuretics, anti ischemics, antihypertensives, antiarrhythmics, drugs for heart failure and dyslipidemia.

### UNIT – IV

A detailed study of the mechanism of action, pharmacology of drugs used in

Autocoid pharmacology- a study of the mechanisms involved in the formation, release, pharmacological actions and possible physiological role of histamine, serotonin, kinins, prostaglandins, opioid autocoids and cyclic 3' – 5' AMP. Systemic pharmacology of drugs acting as agonists and antagonists to the autocoids.

GIT Pharmacology – anti ulcer, prokinetics, antiemetics, antidiarrhoeal and drugs for constipation and irritable bowel syndrome.

Hormone and hormone antagonists. Antibiotics and chemotherapeutic agents.

Analgesics and anti-inflammatory agents.

### UNIT – V

#### FREE RADICAL AND IMMUNO PHARMACOLOGY

Generation of free radicals, role of free radicals in etiopathology of various diseases, protective activity of certain important antioxidants. Cell and biochemical mediators involved in allergy, immunomodulation and inflammation. Classification of hypersensitivity reactions and diseases involved. Therapeutic agents for allergy, asthma, COPD and other immunological diseases with emphasis on immunomodulators.

## Recommended books

1. Clinical Pharmacology by D.R.Lawrence and P.N.Bennette
2. Pharmacology and Pharmacotherapeutics R.S. Satoskar and S.D. Bhandarkar.
3. The Pharmacology basis of therapeutics. 10<sup>th</sup> edition by Louis S.Goodman and Altered Gillman
4. Pharmacology by H.P. Rang and M.A. Dale
5. Biopharmaceutics and Pharmacokinetics and introduction by E. Notary
6. Drug Metabolism by Bernhard Test and Peter Jenner.
7. Principles of Drug action by Goldstein, Aranow and Kolman.
8. Pharmacokinetics : Regulatory Industrial Academic Perspectives, Second Edition, edited by Peter G.Welling and Francis L.S.Tse
9. The Drug Development Process: Increasing Efficiency and cost Effectiveness, edited by Peter G.Welling, Louis Lasagna and Umesh V. Banakar
10. Pharmaceutical Practice , Winfield

## BIOPHARMACEUTICS AND PHARMACOKINETICS

**Subject Code : M.PCOL.T.1.203**

Period / Week: 4

Nature of Exam: Theory

Sessional : 30

Examinations : 70

Duration of Exam: 3 hrs

---

### UNIT -1

**Bioavailability and Bioequivalence:** Objectives, bioavailability & variations, measurements of bioavailability, enhancing bioavailability, concepts of equivalents, official bioequivalence protocols & therapeutic equivalence.

### UNIT -2

**Drug Absorption:** General consideration, absorption / drug transport mechanisms, role factors affecting absorption, absorption of drug non-peroral routes, methods of determining absorption-*in-vitro*, *in-situ*, and *in-vivo* methods.

**Drug Distribution:** Factors affecting, protein & tissue binding, kinetics, determination of rate constants & different plots (direct, Scatchard, & reciprocal).

### UNIT -3

**Pharmacokinetics:** Parameters & determination, pharmacokinetic models – one compartment, multi compartment in IV bolus, IV infusion & extra vascular, drug & metabolites levels in blood, urine and other

biological fluids. Integration of kinetics.

Application of pharmacokinetics in new drug development, design of dosage forms and novel drug delivery systems.

### UNIT - 4

**Drug Disposition and Excretion:** Biotransformation, factors affecting biotransformation, Phase I & Phase-II reactions.

**Clearance:** Concept, renal, non-renal clearance, mechanism, determination, % drug metabolized, different volume of distribution.

### UNIT – 5

**Pharmacokinetics of Multiple Dosing:** Various terminology, determination, adjustment of dosage in renal & hepatic impairment, individualization of therapy, therapeutic drug monitoring.

**Non-linear kinetics:** Cause of non-linearity, estimation of various parameters, bioavailability of drugs that follow non-linear kinetics. Chronopharmacokinetics & pharmacokinetics of elderly and infants.

### Recommended books

1. Biopharmaceutics and Clinical Pharmacokinetics, Mile Gibaldi, Lea and Febriger, Philadelphia.
2. Current concepts in Pharmaceutical Sciences, Swarbrick, Lea and Febriger, Philadelphia.
3. Theory & Practice of Industrial Pharmacy, L.Lachman, Varghese Publ, Bombay.
4. Clinical Pharmacokinetics, Rowland and Tozer, Lea and Febriger, Philadelphia.
5. Biopharmaceutics and Clinical Pharmacokinetics, Niazi, Prentice Hall, London.
6. Remingtons Pharmaceutical Sciences, Mack & Co.
7. Biopharmaceutics & Clinical Pharmacokinetics, DM Brahmankar, Vallabh, Delhi.
8. C.V.S.Subrahmanyam, Textbook of Biopharmaceutics and Pharmacokinetics, 2009, Vallabh Prakashan, Delhi.

## PHARMACOLOGY & PHARMACO THERAPEUTICS

**Subject Code : M.PCOL T.1.204**

Periods/Week : 4

Nature of Exam : Theory

Sessional : 30

Examination : 70

Exam Duration : 3 Hrs

---

### UNIT – I

Principles of Pharmacokinetics.

- A. Revision of Basic concepts.
- B. Clinical Pharmacokinetics.
  - 1. Dose – response in man
  - 2. Influence of renal and hepatic disease on Pharmacokinetics
  - 3. Therapeutics drug monitoring
  - 4. Population Pharmacokinetics.

### UNIT – II

Basics in clinical pharmacology  
Clinical trials of drugs, design of clinical trials  
Therapeutic drug monitoring and criteria for TDM.  
Adverse Drug Reactions, Drug Interactions and ADR monitoring.

### UNIT – III

Pathophysiology and drug therapy of the following disorders.

Schizophrenia, anxiety, depression, epilepsy, Parkinson's Alzheimer's diseases Migraine hypertension, angina pectoris, arrhythmias, atherosclerosis, myocardial infraction, TB, leprosy, leukemia, solid tumors, lymphomas, psoriasis, respiratory, urinary , g.i. tract infections, endocarditic, fungal and HIV infection, rheumatoid arthritis, glaucoma, menstrual disorders, menopause.

### UNIT – IV

Drug therapy and Pharmacokinetics in

- a. Geriatrics
- b. Pediatrics
- c. Pregnancy & Lactation.

### UNIT - V

Pharmacogenetics: Historical aspects of pharmacogenetics, biomarkers, inter-racial and individual variability in drugs metabolism., receptors .Role of drug transporters, interethnic differences, clinical view points and future perspectives, stem cell – a new therapeutic approach. Gene therapy, Pharmacovigilance concepts and its impact.

## **Recommended Books**

1. Biopharmaceutics and Pharmacokinetics, Venkateshwarlu
2. Clinical Pharmacy and therapeutics , Herfindal
3. Drug Disposition and Pharmacokinetics , H.Curry
4. Pharmacokinetics ,Milo Gibaldi
5. Managing clinical Drug development , Cocchetto
6. Pharmacogenomics , Kalow
7. Durg discovery and development, Rang
8. Basic Statistics and Pharmaceutical Statistical applications , Muth
9. Pharmacokinetics for the Pharmaceutical Scientist , Wagner
10. W.H.O Publications ,Technical Report Series.
11. Clinical Pharmacology by D.R.Lawrnce and P.N.Bennette

## ADVANCES IN PHARMACOLOGY PRACTICALS

**Subject Code : M.PCOL P.1.205**

Periods/week : 6

Nature of Exam: Practicals

Sessional : 30

Examination : 70

Exam Duration: 6 Hrs

---

### **List of Experiments.**

**Minimum 8 experiments shall be conducted.**

1. Experiments for studying the effects of the more important biogenic agents like histamine, acetylcholine, 5HT, oxytocin and their effect in the presence of antagonist on suitable isolated tissue preparations.
2. Estimation of PA<sub>2</sub> values of various antagonists under suitable isolated tissue preparations.
3. Experiments on CVS- effect of various drugs on isolated heart preparations on various animal models under normal arrhythmic and hypo dynamic conditions.
4. Drugs acting on Gastro intestinal tract. To study the drug activity on oesophageal motility.
5. Monitoring of drug concentrations in saliva/urine/blood.
6. Action of CNS stimulants and depressants using suitable experimental model.
7. Evaluation of antidepressant and anti anxiety drugs.
8. Drug absorption and elimination studies.
9. Any other experiment based on the topics mentioned in theory,
10. Virtual and stimulated experiments are permitted.

## BIOPHARMACEUTICS AND PHARMACOKINETICS

**Subject Code : M.PCOL.P.1.206**

Period / Week: 6

Nature of Exam: Practicals

Sessional : 30

Examinations : 70

Duration of Exam: 6 hrs

---

### **Suggested experiments**

1. Comparative dissolution studies on different dosage forms for drugs.
2. Effect of pH / particle size on dissolution studies.
3. Plasma protein binding studies on different drugs.
4. Estimation of pharmacokinetic parameters in urine / serum samples.
5. Estimation of creatinine clearance.
6. Estimation of pharmacokinetic parameters for the given urinary excretion data.
7. Estimation of pharmacokinetic parameters for the given oral absorption data.

## **ENTREPRENEURSHIP MANAGEMENT**

**Subject Code : M.PCOL T 1.207**

Periods/week : 2

Nature of Exam: Tutorials

Sessional : 50

Examination : --

Exam Duration: --

---

### **Course Objectives:**

- To provide conceptual inputs regarding entrepreneurship management.
- To sensitize and motivate the students towards entrepreneurship management.
- To orient and impart knowledge towards identifying and implementing entrepreneurship opportunities.
- To develop management skills for entrepreneurship management.

### **UNIT – I: CONCEPTUAL FRAME WORK**

- Concept need and process in entrepreneurship development.
- Role of enterprise in national and global economy
- Types of enterprise – Merits and Demerits
- Government policies and schemes for enterprise development
- Institutional support in enterprise development and management

### **UNIT – II: THE ENTREPRENEUR**

- Entrepreneurial motivation – dynamics of motivation.
- Entrepreneurial competency – Concepts.
